

Meeting Minutes for 10-20-2020

Last year's team got back to us and they do have the PCB design and have forwarded it to us.

We need to purchase the software for recording the brain signals. Kiran said he would order the student version of this, since it was a much cheaper option at 30\$ a month.

The concept design review will be scheduled for Tuesday November 10th from 4:50 to 5:50pm.

Kate said she should have the circuit built by Thursday, Jake said he would have the cap stitched by the same time. Grace said the DVP was almost finished.
